

HardieTrim® Batten Boards

When using 4/4 HardieTrim® batten boards, you can achieve a traditional board and batten exterior.

The HardieZone™ System

HardieTrim® batten boards are the perfect complement to James Hardie® siding products. A complete James Hardie exterior ensures you will have a low maintenance home for years to come.

James Hardie is unveiling a new concept to the building industry—siding that's engineered for climate™. We want every home to have the right exterior for the right climate. Some call it visionary. We call it the HardieZone™ System. The HardieZone™ System provides siding with specific performance attributes relative to the climate where the product is being used. So say goodbye to the days of one-siding-fits-all. James Hardie now gives you the ability to put the optimum siding on a home regardless of location.

Premium look and finish provides a better value for your customers: Like other James Hardie siding products, HardieTrim batten boards have the look and character of natural wood without the maintenance problems. The product's dimensional stability allows paint to last longer than on wood.

The finishing touch: HardieTrim batten boards are easy to cut and nail. Using finish nails on the batten boards hides full-headed nails needed for HardiePanel® vertical siding achieving a clean exterior finish.

An easy-to-use, durable and low maintenance alternative: HardieTrim batten boards resist damage caused by the elements and insects, providing durable and low maintenance alternative to other batten options.
