## TREX ORIGINS™

Versatile *Trex Origins* gives you unprecedented freedom to create decks that go beyond what you dreamed possible. Combine colors, curves and patterns. If you can dream it, you can build it with *Trex*®.

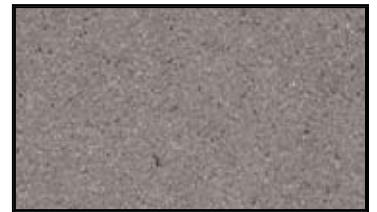

*Trex Origins* is the original smooth *Trex* surface for deck designs with a clean, contemporary feel. Let your imagination wander with spectacular curves and colors. There is nowhere *Trex Origins* can't take you.

### TREX ORIGINS™ COLOR PALETTE\*

Note: HS 24 is only available in Natural and Winchester Grey. 5/4 x 6 is only available in Saddle and Winchester Grey.

## TREX ACCENTS®

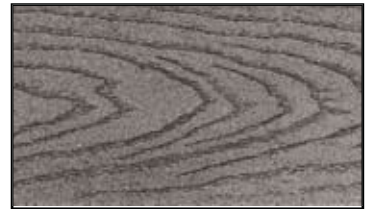

Imagine using all the rich textures and colors of nature in your project, combined with a lasting beauty that resists the test of time. That's the inspiration behind *Trex Accents* reversible decking. Natural wood grain pattern on one side; a smooth, contemporary look on the other. Either way, you now have the ability to create dramatic outdoor spaces like never before. Create a warm, traditional feeling. Or make it clean and contemporary. Work with spectacular curves and patterns, or combine textures with rich colors. Whichever direction you choose, the possibilities are endless.

## TREXBRASILIA™

You might say that we've traveled the world for the inspiration behind our newest line of decking and railing. With new *Trex Brasilia*, you'll find everything you love about the distinctive, exotic look of tropical hardwoods without having to worry about the effects of time and climate. Enjoy the kind of subtle shadings and natural color variations that can only be found in *Trex Brasilia*. All combined with the enduring qualities made possible by *Trex*®.

Explore your sense of adventure and design with the vibrant, warm colors and deep, rich patterns *Trex Brasilia* has to offer. Craft a space of unparalleled beauty with its smooth, refined surface. Like all *Trex* products, *Trex Brasilia* lets you work with spectacular curves and patterns. And it's available in two rich colors—Cayenne and Burnished Amber—to complement any project. With *Trex Brasilia*, your options are virtually unlimited.

## *Trex*® Traditional Railing

*Trex* is an excellent choice, not only for the decking surface, but also for the railing system. A *Trex* railing system expands your deck design capabilities by dividing space in spectacular ways utilizing a wide array of colors, textures and shapes. *Trex* railings are made with the same enduring quality and serve as an elegant touch to the deck of your dreams. *Trex* railings eliminate splinters and give the deck a finished appearance.

The traditional railing system, utilizing either an Anchored or Raised assembly, is designed for those who prefer the traditional railing systems normally associated with wood decks.

## *Trex Designer Series Railing™*

*Trex Designer Series Railing* provides a higher level of design with its shaped top and bottom rails, giving a distinctive look without the cutting or routing normally required. It is not only beautiful, but also easy to install with its unique *TrexExpress™* Assembly Tool. This assembly system makes building with these components faster and easier. The end result is less of the project budget goes to labor costs, making spectacular designs much more affordable.

No detail is too small on a *Trex®* deck. *Trex* offers various colors and styles in post caps and post skirts accessories because the quality and design are in the details.

## *Trex Artisan Series Railing™*

Crafted from a durable PVC composite, *Trex Artisan Series Railing* has a lightly textured surface that is welcoming to the touch and enhances the elegant appearance of the deck. Seamless design and immaculate attention to detail make *Trex Artisan Series Railing* a quality addition to any deck. Our *Trex Artisan Series Railing* sets the standard for aesthetics, whether you choose the traditional look of white balusters or the contemporary look of resin paneling.

*Trex Artisan Series Railing* is made of *Fibrex®* material, a revolutionary composite that provides exceptional performance and structural durability.

### **Aesthetic Appeal**

- Appealing textured finish offers the soft white appearance of painted white wood
- Preferred to bright, shiny appearance of vinyl railings

### **Lasting Durability**

- Internal *Fibrex®* composite construction provides structural integrity without noise common to vinyl systems
- Backed by industry leading 25-year warranty

### **Ease of Installation**

- Developed with extensive input from contractors to refine ease of assembly utilizing *TrexExpress™* Installation System

*Fibrex®* is a registered trademark of Andersen Corporation. Trex Company uses the *Fibrex* trademark under license from Andersen Corporation.

## *Trex*® Landscape Edging

The material that started the revolution in decking is now available for use as landscape edging. The wood and plastic composition prevents moisture and insect damage, making it ideal for edging your garden. Its textured appearance is sure to impress even the gardener's gardener.

**Flexibility:** *Trex* Landscape Edging is extremely flexible. Staking is all that's needed to create perfectly curved sections.

**Long life:** With *Trex* Landscape Edging, you won't find any of the problems associated with wood. No rotting. No insect damage. No splitting. And no cracking. It even resists string trimmer damage.

**Stays in place:** *Trex* Landscape Edging has low thermal expansion/contraction. And unlike plastic, it isn't prone to buckle and heave when temperature changes occur.

**Faster, easier installation:** *Trex* Landscape Edging bends easily without multi-layering. So you'll use less material thereby reducing installation time. And unlike plastic, creating straight runs is easy.

**Color and sizes:** *Trex* Landscape Edging is available in Winchester Grey which fades to a deep rich grey to complement any landscape. Available in 1/2 x 4 16-foot lengths.
